

TRC Commander 32 Station Permanent Universal Receiver Kit

Designed for the commercial contractor, The TRC Commander Permanent Universal Receiver Kit is a completely portable professional grade wireless irrigation system compatible with all 24 VAC irrigation controllers. The TRC Commander Permanent Universal Receiver Kit is the most versatile wireless system in the irrigation industry. It is simple to operate and does not require the irrigation professional to have a license.

At the heart of the Commander System, The TRC Commander Transmitter (not included with this kit) will operate a virtual unlimited number of receivers. It is the only transmitter designed to operate The TRC Commander Permanent Universal Receiver Kit. All Remote Control Technology products are designed to provide the irrigation professional with years of service.
